# ABOUT US

We are into stock market trading since 2017 and we trade and teach price action trading which you can use in any market.

We have started as traders , used to trade in Equity, then options and now we also take trades in forex market, we have our personalised strategies for different markets.

# COURSE OVERVIEW

## PRICE ACTION

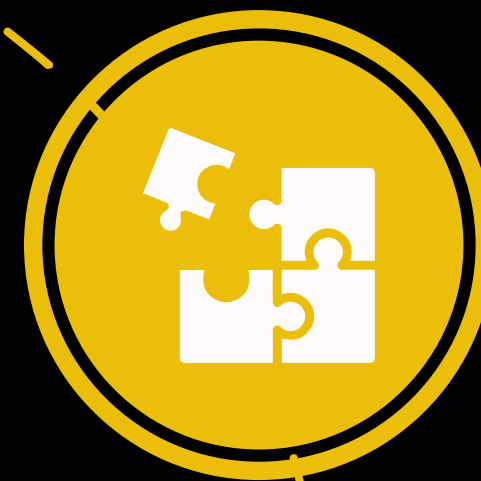

Our whole course is price action based which means you can trade in any market using that price action analysis. And yes less reliability on indicators.

## STRATEGIES

Customised and backtested strategies made for each and every segment for different trading styles.

## QNA SESSIONS

30 mins to 1 hour QnA after every class and revision of the topic. This will help you grasping the topics easily.

# COURSE BENEFITS

## *Notes & Study Material*

- After every class , notes will be provided in pdf format.
- study material includes notes with examples from the market and updation of the strategies, everytime strategy is updated.
- E-books will be provided

- During the period of the course, after the class , if you have any doubts, you can mail your questions.
- After the completion of the course you will still be in the support group where trades and analysis will be shared.
- you can access our trading floor by just paying the monthly charges.

## *Support after Course*

# COURSE MODULE

Our course is designed so well that it not only makes you a good trader but a disciplined person as well. Our course is divided into 4 parts

01

## PRICE ACTION

Price action trading, understanding price behaviour. This quadrant of our course is totally dependent on the price action i.e., technical analysis or chart reading using various price action tools.

02

## FUNDAMENTALS

This quadrant is totally dedicated for the valuations and fundamental analysis of a particular stock. This approach is generally helpful if your purpose is to find good stocks for long term perspective.

03

## STRATEGIES

This quadrant is totally devoted to various strategies tailored all types of segment in trading and for every trading style.

04

## PSYCHOLOGY

This quadrant covers the risk and money management of a trader while taking the trade. As a trader you should know how much to invest in a particular trade.
